

Project Design Phase: Problem - Solution Fit Template

Date	7 July 2026
Team ID	
Project Name	Nutrition Assistant
Maximum Marks	2 Marks

1. Customer Segment

- College students
- Working professionals
- Fitness enthusiasts
- Health-conscious individuals
- People who want to improve their eating habits

2. Customer Problems

- Difficulty tracking daily meals and calorie intake.
- Lack of knowledge about nutritional values of foods.
- Existing nutrition apps are complicated or require paid subscriptions.
- Manual calorie calculation is time-consuming.
- Inconsistent meal tracking due to busy schedules.
- Difficulty maintaining a balanced diet.

3. Existing Alternatives

- Searching nutrition facts on Google.
- Using multiple calorie calculator websites.
- Writing meals in notebooks or spreadsheets.
- Using basic mobile health applications.
- Guessing calorie and nutrient intake without accurate information.

4. Pain Points

- Nutrition information is scattered across different sources.
- Manual tracking requires significant effort.
- Users often forget to record meals.
- Lack of a simple and beginner-friendly interface.
- Difficulty understanding protein, carbohydrates, fats, and calorie intake.

5. Proposed Solution

The Nutrition Assistant is a web application developed using the MERN Stack that enables users to:

- Search for food items and view nutritional information.
- Add meals to a personal meal tracker.
- Automatically calculate daily calorie and nutrient intake.
- View meal history and nutrition summaries.
- Make healthier food choices using accurate nutrition data.

6. Key Features

- User Registration and Login
- Food Search with Nutrition Information
- Meal Tracking Dashboard
- Automatic Calorie Calculation
- Daily Nutrition Summary
- Secure User Data Storage
- Responsive and User-Friendly Interface

7. Customer Benefits (Value Proposition)

- Saves time by automating nutrition tracking.
- Provides reliable nutritional information.
- Encourages healthy eating habits.
- Helps users achieve fitness and health goals.
- Easy to use for beginners as well as regular users.
- Accessible anytime through a web browser.

8. Success Metrics

- Number of registered users.
- Daily active users.
- Meals logged per day.
- User satisfaction and feedback.
- Improvement in consistent meal tracking.
- Increased awareness of healthy eating habits.

Conclusion

The Nutrition Assistant addresses the major challenges faced by individuals who want to maintain a healthy lifestyle. By simplifying meal tracking, providing accurate nutritional information, and automating calorie calculations, the solution effectively fits the needs of its target users and encourages long-term healthy eating habits.
