

Ideation Phase: Brainstorm & Idea Prioritization Template

Date	7 July 2026
Team ID	
Project Name	Nutrition Assistant
Maximum Marks	4 Marks

1. Team Gathering, Collaboration and Selection of the Problem Statement

Our team conducted an initial meeting to discuss different project ideas based on current societal needs and our technical skills. Each team member shared suggestions related to healthcare, education, e-commerce, and lifestyle applications. After discussing the feasibility, scope, and available development time, we agreed to build an AI Nutrition Assistant.

The selected problem statement focuses on helping users maintain a healthy lifestyle by tracking their daily meals, monitoring calorie intake, and viewing nutritional information. Many people find it difficult to estimate the nutritional value of the food they consume, which can lead to unhealthy eating habits. Our project aims to provide an easy-to-use web application that assists users in making informed dietary decisions.

The team collaboratively defined the project objectives, divided responsibilities among members, and planned the development process using the MERN stack (MongoDB, Express.js, React.js, and Node.js).

Ideation Phase: Brainstorm & Idea Prioritization Template

2. Brainstorming, Idea Listing and Grouping

During the brainstorming session, team members generated several project ideas without evaluating them initially. The purpose was to encourage creativity and identify projects that solve real-world problems.

Ideas Generated:

- AI Nutrition Assistant
- Online Medical Appointment System
- Student Attendance Management System
- Smart Expense Tracker
- Blood Donation Management System
- Library Management System
- Fitness Tracker
- Online Food Ordering System

Grouping of Ideas:

- **Healthcare:** AI Nutrition Assistant, Online Medical Appointment System, Blood Donation Management System
- **Education:** Student Attendance Management System, Library Management System
- **Lifestyle:** Smart Expense Tracker, Fitness Tracker, Online Food Ordering System

Ideation Phase: Brainstorm & Idea Prioritization Template

3. Idea Prioritization

The shortlisted ideas were evaluated using several criteria, including innovation, technical feasibility, social impact, implementation complexity, and project scope.

Idea	Innovation	Feasibility	Social Impact	Overall Priority
AI Nutrition Assistant	High	High	High	1
Smart Expense Tracker	Medium	High	Medium	2
Student Attendance Management System	Low	High	Medium	3
Online Medical Appointment System	Medium	Medium	High	4

Based on this evaluation, the AI Nutrition Assistant was selected as the final project because it provides a practical solution for improving dietary habits, is feasible to implement using the MERN stack, and offers significant benefits to users by helping them monitor nutrition and calorie intake efficiently.
