

Project Design Phase-II Phase: Data Flow Diagram & User Stories

Date	7 July 2026		
Team ID			
Project Name	Nutrition Assistant		
Maximum Marks	4 Marks		
User (Web Client)		0.0 Nutrition Assistant System	External APIs

ms Overview

The following details show the context levels and core data structures of the Nutrition Assistant. The diagrams outline how user inputs are validated, cached, queried in external databases, and displayed.

2. Level 0 Context Diagram (DFD)

3. Agile User Stories (Sprint Tasks)

User Type	Story No.	User Story / Task	Acceptance Criteria	Priority	Sprint
Customer	USN-1	Register for application by entering email and password details.	Can access account and dashboard after creation.	High	Sprint-1
Customer	USN-2	Log in securely using validation credentials.	Redirected to dashboard dashboard layout view.	High	Sprint-1
Customer	USN-3	Log out of sessions securely.	JWT cleared. Redirected back to login screen.	High	Sprint-1
Customer	USN-4	View custom nutrition progress bar tracking lists.	Daily caloric target bars loaded accurately.	High	Sprint-1
Customer	USN-5	Search food items using database names.	Nutritional macro summaries rendered immediately.	High	Sprint-1
Customer	USN-6	Review previous logs history.	Can toggle dates to view past logged items.	Medium	Sprint-3
Customer	USN-7	Calculate aggregate nutrition levels.	Alerts display if daily set macros are crossed.	High	Sprint-4
Admin	USN-8	Manage registered user accounts.	Dashboard allows disabling user details.	Medium	Sprint-4

Project Design Phase-II Phase: Data Flow Diagram & User Stories

User Type	Story No.	User Story / Task	Acceptance Criteria	Priority	Sprint
Admin	USN-9	Audit total system metrics.	Aggregated counts accessible for checks.	Low	Sprint-4
Support	USN-10	View contact lists and help queries.	Feedback forms persisted and loaded on request.	Low	Sprint-4
